3B Görsel Model Kütüphanesi
3D Visual Models Library

Özellikler
- 7 kategori (Sabit kanatlı, döner kanatlı, kara araçları, su üstü ve su altı araçları, silahlar hav maydankı, jenerik)
- Fotoğraf kalitesinde görsel
- Endüstri standartı dosya formatları
- 3 ila 6 seviye LOD
- Hasarlı durum kaplamaları
- Kızılötesi kaplamaları
- Bolunmuş ve oynar parçalar (namlu, lanço, kanat, pervane, teker, vb.)

Being developed for military and civilian training simulation systems, 3D Visual Models Library is a visual database that brings photo-specific visual quality together with high real time performance. It provides optimum visual quality for a wide variety of hardware with different performance levels. It is designed to be plug and play with its industrial standard formats and interfaces enabling easy integration with many simulation software.

Key Features
- 7 categories (Fixed wing, rotary wing, ground vehicles, surface and subsurface platforms, weapons, airports, generic)
- Photo-specific visual quality optimized for rendering
- Industrial standard file formats
- Three to six levels of detail (LODs)
- Damage state textures
- IR Textures
- Articulated and animated parts (turret, launcher, wing, rotot, wheel, etc.)
